Power BI Executive Dashboard Build Reference

1. Semantic Model

- Dimensions: Accounts, Plans, Products, Account Managers and Date.
- Facts: Monthly Snapshot, Invoices, Support Tickets, NPS, Marketing Spend and Subscriptions.
- Bridge: Account Products.
- MRR/ARR come from the monthly recurring-revenue fact, not invoice cashflow.

2. Page 1 — Executive Growth Quality

- Cards: ARR, MRR, NRR, GRR, Active Logos, ARPA, ARR at Risk.
- ARR and retention trends.
- Segment scorecard.

3. Page 2 — ARR Bridge & Retention

- MRR waterfall.
- Cohort retention heatmap.
- Segment / region / billing slicers.

4. Page 3 — Customer Health & Renewals

- ARR by health band.
- At-risk account table.
- 90-day renewal queue and drill-through.

5. Page 4 — Pricing & Monetization

- Actual vs standard discount.
- Leakage by segment / plan / account.
- Top leakage queue.

6. Page 5 — Product Adoption & Expansion

- Seat utilization.
- Add-on attach.
- Expansion candidate queue.

7. Page 6 — Acquisition Economics

- Spend, new logos and CAC.
- Compare low CAC with retained quality.

8. Page 7 — Customer Success Operating Model

- Portfolio ARR vs capacity.
- Risk ARR by CSM.
- Rebalancing queue.

9. DAX Starter Layer

Use `05_PowerBI/01_DAX_Measures.dax` as the starter measure layer and add explicit Date-table context to final NRR/GRR measures.
